Quality brand since 1919

Röttgers Ketten has been a recognised manufacturer of quality chains since 1919. From the abbreviation of the company founder August Röttgers, the brand name aRö developed into a byword for chains of the highest quality.

At its location in Iserlohn in North Rhine-Westphalia, the family-owned company manufactures heat resistant stainless steel chains, conveyor chains for agriculture and food industry, sling chains, pump chains, hoist chains, anchor chains and chains for playgrounds.

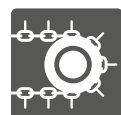

*„We produce 2 million metres of chain in Iserlohn every year.
A chain of this length would stretch from Iserlohn to Moscow“.*

Below, we would like to present a few examples from our range of products in more detail. In addition to standard chains, we also produce and supply chains manufactured according to customers' specifications. We look forward to receiving your enquiry and are available to provide you with expert advice.

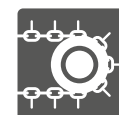

Max Röttgers
Managing Director

Wire thickness **3** to **18** mm

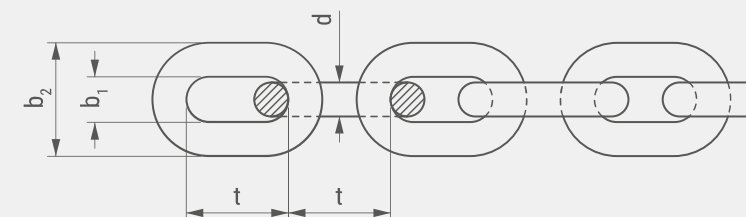

Conveyor chains for meat/poultry processing systems

Conveyor chains for meat/poultry processing systems

Conveyor chains, tested, with acceptance test certificate EN 10204-3.1
